OBJECTIVE

Driven software engineer with a passion for solving complex problems and a commitment to ongoing learning. Eager to advance my career by embracing fresh challenges and leveraging emerging technologies.

TECHNICAL SKILLS

Python, Flask, SQL, Kotlin, Spring Boot, Kubernetes, Apache Kafka, GCP, Javascript, Nodejs, Git, Linux

SOFT SKILLS

Team Work, Communication, Problem Solving, Self-Starter, Remote Experience

EXPERIENCE

TaxRise — *Software Engineer*

September 2023 - Present

- Complete apex development initiatives to streamline the sales process
- Back end development of Python and NodeJS endpoints to support business use cases.
- Drive continuous improvement through the adoption of best practices and innovative approaches, ensuring optimal performance and user experience.

Figure — *Software Engineer*

March 2021 - July 2023

- Developed the back end infrastructure of a lead portal, enabling seamless registration of loan officers, lead creation, and progression to loan applications.
- Created an admin portal, empowering partners to manage their organization's loan officer network.
- Worked collaboratively with product, compliance, and other engineering teams to ensure all necessary product support and business rules were covered

NetApp — *Software Engineer*

June 2019 - August 2020

- Created a back end API in Go to provide necessary information for a new hardware configuration.
- Built a user-friendly interface using Angular for a new hardware setup, enabling us to expand our product offerings to customers.
- Worked to make an inherited Python code base more efficient and adaptable by removing limiting assumptions and making it more modular.

EDUCATION

Wichita State University, Wichita KS — *BS in Computer Science*

August 2015 - May 2019
